

FLEA CONTROL THE RIGHT WAY

FLEAS ARE HARDY INSECTS AND DIFFICULT TO ELIMINATE. IF A PROPER PROGRAM IS NOT INSTITUTED, RETREATING ANY NUMBER OF TIMES BECOMES NECESSARY WITHOUT SUCCESS. THUS, TO SAVE TIME, MONEY AND FRUSTRATION; INSTITUTE A PROPER PROGRAM THE FIRST TIME !!!

TO TREAT FLEAS REQUIRES A 3-PART PROGRAM:

1. TREAT ALL ANIMALS IN THE HOME.
2. TREAT THE ANIMAL'S SKIN PROBLEM CAUSED BY THE FLEA OR FLEA ALLERGY.
3. TREAT THE ENVIRONMENT (YOUR HOME AND YARD). FLEAS SPEND ABOUT 2/3 OF THEIR LIVES OFF THE ANIMAL AS LARVAE. THEY CAN LIVE FOR UP TO A YEAR OFF YOUR PET IN YOUR CARPET, FLOORS AND YARD.

IMPORTANT: TREAT THE HOUSE AND THE YARD THE SAME DAY AT THE SAME TIME !!!

OUTLINE FOR TREATMENT:

1. CHOICES: BATH, DIP, SPRAY, POWDER
FREQUENCY OF USE:
2. TREAT THE SKIN CONDITION WITH ANTIBIOTICS, ANTIHISTAMINES AND/OR STEROIDS.
3. FOR THE FUTURE:

THE ENVIRONMENT- FLEAS CAN JUMP INCREDIBLE DISTANCES; TREAT THE ENTIRE HOUSE AND YARD.

1. FIRST, VACUUM AND MOP ALL THE FLOORS IN THE HOME.
2. FOR THE HOME, SPRAY THE HARD TO REACH AREAS WITH PREMISE SPRAY, FOR EXAMPLE: SPRAY THE SOFA, THE FLOORS OF CLOSETS, ETC. IF YOUR FLEA PROBLEM IS MINOR (ASK THE DOCTOR) YOU MAY USE THE SPRAY ALL OVER THE HOUSE- FLOORS, FURNITURE, AND STOP WITH THIS. IF NOT, MOVE ON TO THE NEXT STEP.
3. USE FOGGERS IN THE HOME. FOLLOW DIRECTIONS CAREFULLY ON THE CONTAINER AS THIS IS A VERY STRONG CHEMICAL.
4. TREAT THE YARD WITH APPROPRIATE SPRAY.

RETREATMENT IS SOMETIMES NECESSARY IN 3 WEEKS DEPENDING ON THE SEVERITY OF THE INFESTATION.
