

Animal True or False

Spaying (females) or neutering (males) your pet is very important. They keep adult dogs and cats from having litters of unwanted puppies and kittens. For each sentence below, solve the math problem and write the answer in the circle. If the answer is an even number, the sentence is true. If the number is odd, the sentence is false. Place a "T" next to each true sentence and an "F" next to each false one.
